

Sebastián de Jesús Hernández Montero

Coatzacoalcos, Veracruz, Mexico | sebashhermon003@gmail.com | LinkedIn | GitHub

Professional Profile

Software Engineer focused on backend development, with experience designing and developing web applications and REST APIs. Experienced in Java/Spring Boot, TypeScript/NestJS, PHP/Laravel, and Rust/Actix Web, as well as relational databases, Docker, and Nginx. Capable of developing scalable and maintainable solutions while applying software engineering best practices and business logic.

Professional Experience

H. Ayuntamiento de Coatzacoalcos

January 2026 – August 2026

Backend Developer – Government Innovation Department

- Backend development of a web application for managing the government ruling workflow using **NestJS** and **Microsoft SQL Server**.
- Designed and implemented REST APIs and business logic for the system's different processes.
- Containerized services using **Docker**.
- Configured **Nginx** as a reverse proxy to route requests between services.
- Participated in deployment processes, equipment inventory, and citizen support activities.

GPC Logística

August 2025 – December 2025

Information Technology Intern

- Performed corrective, preventive, and evolutionary maintenance on an ERP system developed with **Laravel 10**.
- Developed and integrated new features focused on business processes and business logic.
- Developed interactive and responsive components using **Laravel Livewire** and technologies within the Node.js ecosystem.

Education

Universidad Veracruzana – Coatzacoalcos Campus

2022 – 2026

Bachelor's Degree in Software Engineering

Overall GPA: **9.5/10**

- **1st Place** – ANFECA Knowledge Marathon, National Level.
- **2nd Place** – ANFECA Knowledge Marathon, Regional Level, Southern Zone 6.

Relevant Projects

SAGOZ Barbershop – Web Application

Full Stack Developer

Web application for managing appointments, services, staff, schedules, and branches. Developed with **Next.js**, **Express.js**, and **MySQL**, using **Docker** and **Nginx** for deployment and administration.

FAGIA – REST API

Academic Project

REST API developed with **Rust** and **Actix Web**, focused on managing and exposing donation data for charitable institutions, facilitating the control and administration of received resources.

IMSS Relational Database

Academic Project

Designed and implemented a relational database to manage information on hospitals, staff, and patients belonging to the Mexican Social Security Institute (IMSS).

Technical Skills

Languages	Java, TypeScript, JavaScript, Rust, PHP, Python, SQL
Backend	Spring Boot, JPA/Hibernate, NestJS, Express.js, Laravel, Actix Web, FastAPI
Frontend	React, Next.js
Databases	MySQL, Microsoft SQL Server, MongoDB
DevOps / Infrastructure	Docker, Nginx, Git, Linux
Other	REST APIs, web application architecture, enterprise software development

Languages

Spanish: Native

English: Intermediate
